Features and benefits

- FN 3025 filters are designed for traditional chassis mounting
- For extra fast installation, FN 3026 filters can comfortably be snapped-in on TS 35 DIN-rails
- Two different performance levels are of- fered (L types, P types). The suitable filter can be selected by choosing the required performance level, the admissible leakage current and the preferred installation style
- A plastic housing and a metal ground plate are cleverly combined to get the lowest possible product weight without compromizing EMC behavior
- The embedded jump-terminal system from Schaffner guarantees user-friendly hand- ling as well as fast and reliable electrical connection
- Captive hinged protective covers contri- bute to overall safety by offering protection against unintended contact with life con- ductors. They are included in the standard delivery package without causing extra cost
- Very low leakage current values make these filter ranges ideally suitable for use in Japanese electricity networks as well as in applications which set value on safety and reliability

Typical applications

- Applications with the requirement for extremely compact filter solutions
- Applications with tough leakage current requirements or sensitive earth leakage detectors
- Applications with insufficient internal filtering or moderate interference levels
- Automation equipment
- Motor drives and servo drives with short motor cables
- Applications including stepping motors
- Semiconductor manufacturing equipment
- Electrical cabinets
- Three-phase power supplies
- Medical equipment (not patient-coupled)

Installation

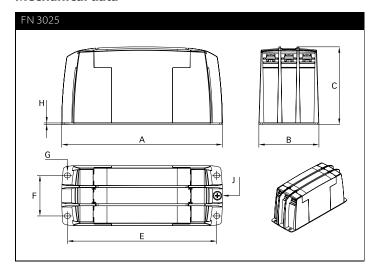

EMC/EMI Products

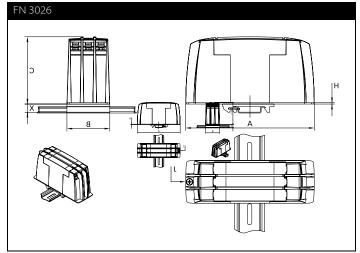

FN 3025/FN 3026 are delivered with closed plastic covers and unfastened terminals. To install the filter please proceed as follows:

- Mount the filter on a metal surface with four screws or snap it onto a TS 35 DIN- rail.
- First connect the green/yellow wire to the earth stud of the filter.
- Gently lift the two hinged plastic covers.
- I Connect phase wires with cable lugs by pushing down and tightening the screws.
- I Please note the torque recommendation on top of the filter.
- Push the covers back into their locked position to finish the filter installation.
