## High Power Infrared Emitter (850 nm) Version 1.5/ OS-IN-2015-033

### SFH 4259

#### Features:

- High Power Infrared LED
- Half angle:  $\pm 25^\circ$
- High forward current allowed at high temperature
- Short switching times
- The product qualification test plan is based on the guidelines of AEC-Q101-REV-C, Stress Test Qualification for Automotive Grade Discrete Semiconductors.

#### Applications

- Infrared Illumination for cameras
- IR data transmission
- Sensor technology

#### Notes

Depending on the mode of operation, these devices emit highly concentrated non visible infrared light which can be hazardous to the human eye. Products which incorporate these devices have to follow the safety precautions given in IEC 60825-1 and IEC 62471.

#### Ordering Information

| Type:    | Radiant Intensity                                               | Ordering Code |
|----------|-----------------------------------------------------------------|---------------|
|          | $I_e$ [mW/sr]<br>$I_F = 100 \text{ mA}$ , $t_p = 20 \text{ ms}$ |               |
| SFH 4259 | 55 ( $\geq 32$ )                                                | Q65110A2464   |

Note: Measured at a solid angle of  $\Omega = 0.01 \text{ sr}$

## Version 1.5/ OS-IN-2015-033

### Disclaimer

Language english will prevail in case of any discrepancies or deviations between the two language wordings.

### Attention please!

The information describes the type of component and shall not be considered as assured characteristics.

Terms of delivery and rights to change design reserved. Due to technical requirements components may contain dangerous substances.

For information on the types in question please contact our Sales Organization.

If printed or downloaded, please find the latest version in the Internet.

### Packing

Please use the recycling operators known to you. We can also help you – get in touch with your nearest sales office.

By agreement we will take packing material back, if it is sorted. You must bear the costs of transport. For packing material that is returned to us unsorted or which we are not obliged to accept, we shall have to invoice you for any costs incurred.

### Components used in life-support devices or systems must be expressly authorized for such purpose!

Critical components\* may only be used in life-support devices\*\* or systems with the express written approval of OSRAM OS.

\*) A critical component is a component used in a life-support device or system whose failure can reasonably be expected to cause the failure of that life-support device or system, or to affect its safety or the effectiveness of that device or system.

\*\*) Life support devices or systems are intended (a) to be implanted in the human body, or (b) to support and/or maintain and sustain human life. If they fail, it is reasonable to assume that the health and the life of the user may be endangered.

### Glossary

- <sup>1)</sup> **Thermal resistance:** junction -ambient, mounted on PC-board (FR4), padsize 16 mm<sup>2</sup> each
- <sup>2)</sup> **Thermal resistance:** junction - soldering point, of the device only, mounted on an ideal heatsink (e.g. metal block)
- <sup>3)</sup> **Typical Values:** Due to the special conditions of the manufacturing processes of LED, the typical data or calculated correlations of technical parameters can only reflect statistical figures. These do not necessarily correspond to the actual parameters of each single product, which could differ from the typical data and calculated correlations or the typical characteristic line. If requested, e.g. because of technical improvements, these typ. data will be changed without any further notice.
