MJD360T4-A MJD361T4-A

Low voltage complementary power transistors

Preliminary data

Features

- Those devices are qualified for automotive application
- Low collector emitter saturation voltage
- Surface-mounting TO-252 power package in tape and reel

Applications

General purpose switching and amplifier transistor

Description

The devices are manufactured in planar technology with "base Island" layout. The resulting transistor shows exceptional high gain performance coupled with very low saturation voltage.
