I-Trac™ Daughtercard Press-In Tool

# I-Trac<sup>™</sup> Daughtercard Module Installation Application Tooling Specification Press-In Tool Order No. 62201-8623

#### **FEATURES**

- Lip provided for positive alignment to connector assembly.
- Tool provides uniform distribution of press force across entire pin array.
- May be used as a stand-alone tool or mounted in an optional holder with other Molex press-in tools.

#### **SCOPE**

<u>Products</u>: I-Trac™ Daughtercard Signal Module Assembly, 76040 Series 9 Column Assemblies. See Product List below for specific part numbers.

#### **Product List**

The following is a partial list of the product order numbers and their specifications this tool is designed to run. Updates to this list are available on <a href="https://www.molex.com">www.molex.com</a>.

76040 Series number							
Guide Style	Columns	Assembly Order Number					
Open	9	76040-0009	76040-1009				
Left	9	76040-2009	76040-2109	76040-2209	76040-2309	76040-2409	
		76040-2509	76040-2609	76040-2709	76040-2809

I-Trac™ Daughtercard Press-In Tool

## **Tool Setup**

Depending on the number of connectors to be installed and/or the press used, this tool can be used alone or with a group of press-in tools, mounted in a 62201-95XX rail (ordered separately). See Figure 1.

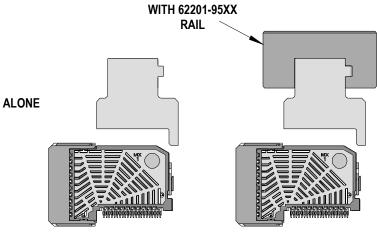

Figure 1

#### **Tool Installation**

The 62201-95XX rail is available in a variety of lengths to accommodate multiple press-in tools.

Rail Part Number	Rail Overall Length		
62201-9501	24mm (0.94 in)		
62201-9502	72mm (2.83 in)		
62201-9503	156mm (6.14 in)		
62201-9504	216mm (8.50 in)		
62201-9509	254mm (10.0 in)		
62201-9511	305mm (12.0 in)		

Reference: This Press-In Tool is 33.2mm (1.31 in.) long.

# Printed Circuit Board (PCB) Support

The I-Trac™ connectors require up to 1.81kg (4 lb) of force per pin to press into the PCB. To prevent excessive PCB flexure and/or damage to the PCB, a support plate is strongly recommended directly beneath the connector hole pattern.

Due to the custom nature of every application, Molex does not offer any PCB support plate. The customer must furnish their own support plate.

When creating the PCB support plate, remember to allow clearance for the connector pins as they pass through the PCB thickness.

I-Trac™ Daughtercard Press-In Tool

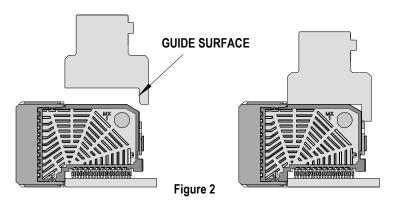

### **Press Equipment Recommendations**

Many types of presses can be used to install I-Trac™ connectors, but to assure consistent connector installation Molex recommends the following press criteria:

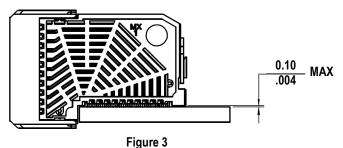

- 1. The capability to detect force variations as low as 4.5kg (10 lb) during the press-in cycle; excessive force measurements should stop the press-in cycle.
- 2. The rate of pressing can be regulated as low as 0.13mm (0.005 in) per second.
- 3. Press stroke control to within 0.25mm (0.010 in).
- 4. Total press stroke must be at least 19mm (0.75 in).
- 5. For statistical purposes, automatic collection of force and distance data.

### **Tool Operation**

- 1. Carefully insert, by hand, the Daughtercard module(s) into the PCB hole pattern.
- 2. Place the application tool on top of the Daughtercard module with the back guide surface of the tool against the back of the Daughtercard module. See Figure 2.

3. Using the application tool and an appropriate press, seat the Daughtercard module until there is less than 0.10mm (.004 in) clearance between the bottom of the plastic housing and the surface of the PCB. See Figure 3.

(Daughtercard shown; same dimensions for RAM)

There should be no broken stand-offs along the perimeter of the part (an indication of over-pressing).

I-Trac™ Daughtercard Press-In Tool

**CAUTION**: To prevent injury, never operate any press without the guards in place. Refer to the press manufacturer's instruction manual.

**CAUTION**: Molex application tooling specifications are valid only when used with Molex connectors and tooling.
