- 1. Identify connector parts. (3 piece parts)
- 2. Slide crimp sleeve over the cable as shown.
- 3. Strip cable per dimensions given and loosen braid.
- 4. Place contact over cable center conductor and position against insulation.
- 5. Crimp (.042 crimp hex) or solder contact. If crimping the contact, crimp the contact as close as possible to the cable insulation as shown.
- 6. Push the cable with the attached contact into the connector body until contact is captured by internal rib within connector body. Contact location shall be per dimension shown. Slide crimp sleeve over braid until it rests against top of connector body. Finish assembly by crimping with appropriate crimp hex die as indicated for each connector by the table.
