Adapter Construction

The adapter is made up of 2 sub-assemblies. They assemble via connectors making the adapter modular. This way the sub-assemblies can be replaced easily.

The following chart lists the adapters described by this datasheet and their subassemblies.

Adapter	Test Socket	Board
PA40-44-X-DZ-PP	40-ADZ *	PA40-44-X
PA40-44-X-DP-PP	none *	PA40-44-X

* The board always has a 40 pin DIP production socket. The optional test socket plugs into the production socket.

When disassembling the adapter take care not to bend the pins. When reassembling the adapter note the pin 1 indicators to align the parts correctly.

Adapter Wiring

The adapter is custom configurable by adding wires or jumpers between two set of wire-wrap posts. The outer set connects to the PLCC plug. The inner set connect to the DIP socket.

The following chart could be filled out by the user to document the adapters wiring.
