PROJECT INFORMATION

Project Name

Catalog No.

Date

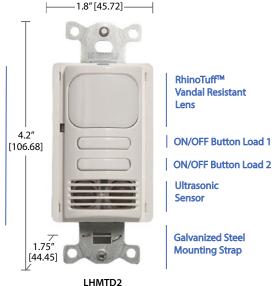

With a coverage area of up to 1,000 square feet and 180° of detection, the *LightHAWK*2 Dual Technology Wall Switch Sensor combines ultrasonic (US) and passive infrared (PIR) technologies for unequaled motion detection. By far the most versatile and widely used sensorin the *LightHAWK*2 product line, this sensor can be used in a large number of applications, and won't leave users waving their hands in the dark.

LHMT sensors feature Hubbell Controls' patented IntelliDAPT* technology, which makes all the sensor adjustment decisions automatically. Throughout the product's lifespan, smart software analyzes the controlled area and makes digital adjustments to sensitivity and timer settings. Occupancy sensors with <code>IntelliDAPT</code> provide a maintenance-free install-and-forget operation. With selectable operating modes—auto on/off or manual on/auto off—and a built-in photosensor for automatic daylight harvesting, LHMT sensors are the most capable choice in today's marketplace.
