(PRG3216)

For operation above 70°C, power must be derated according to the following chart.

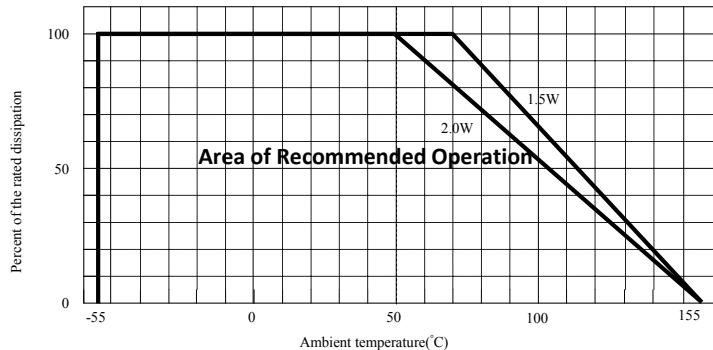

However, in actual use, verify the fillet temperature is not exceeding 155°C.

(PRG5025)

For operation above 1.5W:70°C, 2.0W:50°C, power must be derated according to the following chart

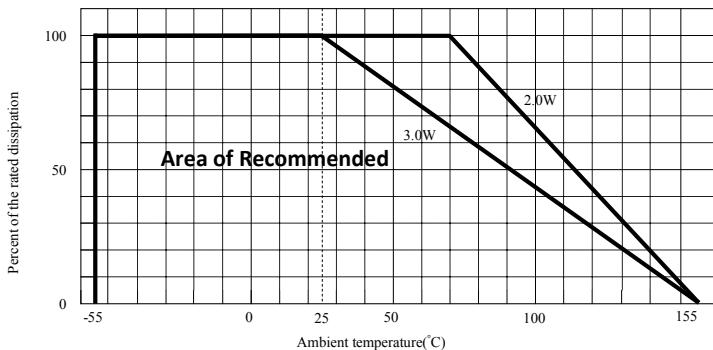

However, in actual use, verify the fillet temperature is not exceeding 155°C.

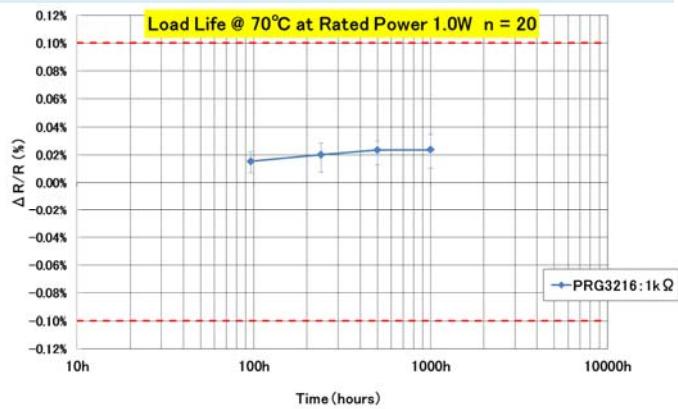

(PRG6432)

For operation above 2.0W:70°C, 3.0W:25°C, power must be derated according to the following chart

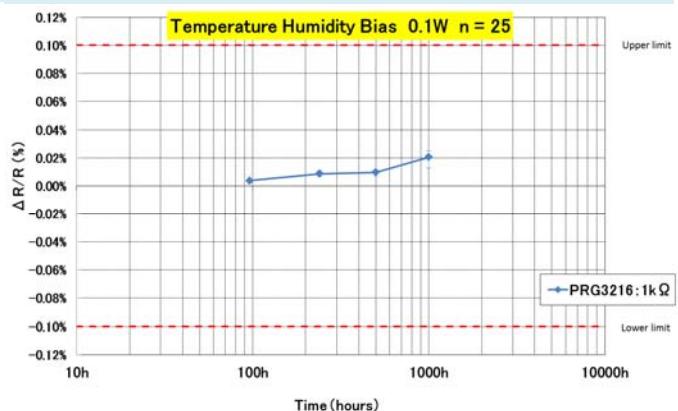

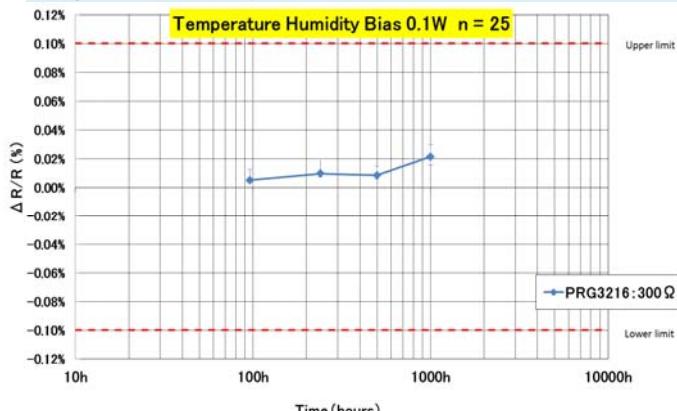

However, in actual use, verify the fillet temperature is not exceeding 155°C.
