## SIKYWORKS

## DATA SHEET

## SKY13415-485LF: 0.1 to 3.0 GHz SP5T Antenna Switch

## Applications

- Any 2G/3G/4G antenna diversity or LTE (TDD/FDD) transmit/receive system

## Features

- Broadband frequency range: 0.1 to 3.0 GHz
- Low insertion loss: 0.45 dB typical @ 2.7 GHz
- High isolation: >30 dB @ 2.7 GHz
- Internal $50 \Omega$ port to control diversity antenna impedance when device is not in use
- Integrated logic
- Small QFN (14-pin, $2.0 \times 2.0 \mathrm{~mm}$ ) package (MSL1, $260{ }^{\circ} \mathrm{C}$ per JEDEC J-STD-020)

Skyworks Green ${ }^{\text {TM }}$ products are compliant with all applicable legislation and are halogen-free. For additional information, refer to Skyworks Definition of Green ${ }^{T M}$, document number SQ04-0074.

## Description

The SKY13415-485LF is a Single Pole, Five-Throw (SP5T) antenna switch with an internal $50 \Omega$ termination. The high linearity performance and low insertion loss achieved by the SKY13415-485LF make it an ideal choice for main/diversity switching commonly used in LTE-based handsets, data cards, and tablets that use antenna diversity solutions.
The SKY13415-485LF is part of a scalable family of products that covers SP4T through SP8T switches that allow up to eight bands of WCDMA/LTE:

- SKY13414-485LF SP4T Antenna Switch (Data Sheet \#201689)
- SKY13415-485LF SP5T Antenna Switch (this Data Sheet)
- SKY13416-485LF SP6T Antenna Switch (Data Sheet \#201679)
- SKY13417-485LF SP7T Antenna Switch (Data Sheet \#201661)
- SKY13418-485LF SP8T Antenna Switch (Data Sheet \#201712)

The symmetric port designs provide flexibility in signal routing for both receive diversity and higher power
TD-SCDMA/TDD-LTE, WCDMA/FDD, and LTE transmit/receive applications.

Figure 1. SKY13415-485LF Block Diagram

Switching is controlled by three CMOS/TTL-compatible control voltage inputs (V1, V2, and V3). Depending on the logic voltage level applied to the control pins, the ANT pin is connected to one of five switched RF outputs (RF1 to RF5) using a low insertion loss path, while the paths between the ANT pin and the other RF pins are in a high isolation state. The antenna path can also be closed on a $50 \Omega$ load when it needs to be terminated. The $50 \Omega$ load is internally grounded. No external blocking capacitors are required on the RF paths unless VDC is externally applied.
The SKY13415-485LF is manufactured in a compact, 14-pin 2.0 x 2.0 mm, Quad Flat No-Lead (QFN) package.

A functional block diagram is shown in Figure 1. The pin configuration and package are shown in Figure 2. Signal pin assignments and functional pin descriptions are provided in Table 1.

Figure 2. SKY13415-485LF Pinout - 14-Pin QFN (Top View)

Table 1. SKY13415-485LF Signal Descriptions (Note 1)

| Pin | Name | Description | Pin | Name | Description |
| :---: | :--- | :--- | :---: | :--- | :--- |
| 1 | RF5 | RF I/O path 5 | 8 | N/C | Not connected |
| 2 | RF3 | RF I/O path 3 | 9 | RF2 | RF I/O path 2 |
| 3 | RF1 | RF I/O path 1 | 10 | RF4 | RF I/O path 4 |
| 4 | VDD | DC power supply | 11 | N/C | Not connected |
| 5 | V3 | DC control voltage 3 | 12 | N/C | Not connected |
| 6 | V2 | DC control voltage 2 | 13 | ANT | Antenna port |
| 7 | V1 | DC control voltage 1 | 14 | N/C | Not connected |

[^0]Table 2. SKY13415-485LF Absolute Maximum Ratings (Note 1)

| Parameter | Symbol | Minimum | Maximum | Units |
| :---: | :---: | :---: | :---: | :---: |
| Supply voltage | VDD | 2.5 | 5.0 | V |
| Control voltage (V1, V2, and V3) | Vctl | -0.5 | +3.0 | V |
| RF input power (RF1 to RF5) | PIN |  | +37.5 | dBm |
| RF power applied to antenna in the $50 \Omega$ switched RF output state | PIN |  | +27 | dBm |
| Operating temperature | Top | -40 | +85 | ${ }^{\circ} \mathrm{C}$ |
| Storage temperature | Tstg | -55 | +150 | ${ }^{\circ} \mathrm{C}$ |
| Electrostatic discharge: <br> Human Body Model (HBM), Class 1C | ESD |  | 1000 | V |

Note 1: Exposure to maximum rating conditions for extended periods may reduce device reliability. There is no damage to device with only one parameter set at the limit and all other parameters set at or below their nominal value. Exceeding any of the limits listed here may result in permanent damage to the device.

CAUTION: Although this device is designed to be as robust as possible, electrostatic discharge (ESD) can damage this device. This device must be protected at all times from ESD. Static charges may easily produce potentials of several kilovolts on the human body or equipment, which can discharge without detection. Industry-standard ESD precautions should be used at all times.

## Functional Description

The SKY13415-485LF includes an internal negative voltage generator and decoder that eliminate the need for external DC blocking capacitors on the RF ports. No external components are required for proper operation. DC decoupling capacitors may be added on the VDD and control lines if necessary.
Switching is controlled by three control voltage inputs, V1, V2, and V3. Depending on the logic voltage level applied to the control pins, the antenna pin is connected to one of five switched RF outputs or a $50 \Omega$ termination.
Shutdown mode is enabled by connecting all three control pins (V1, V2, and V3) to logic high. This mode reduces the overall current consumption of the device to $5 \mu \mathrm{~A}$ typical.

## Electrical and Mechanical Specifications

The absolute maximum ratings of the SKY13415-485LF are provided in Table 2. Electrical specifications are provided in Table 3.
The state of the SKY13415-485LF is determined by the logic shown in Table 4.

The isolation matrix shown in Table 5 provides the port-to-port and antenna-to-port isolation for all available RF states at three different frequencies: $1.0 \mathrm{GHz}, 2.0 \mathrm{GHz}$, and 2.7 GHz .

Table 3. SKY13415-485LF General Electrical Specifications (Note 1)
(Vod = 2.6 V, V1 = V2 = V3 = 0/1.8 V, Pin = 0 dBm , Top $=+\mathbf{2 5}^{\circ} \mathrm{C}$, Characteristic Impedance [Z0] = $\mathbf{5 0} \Omega$, Unless Otherwise Noted)

| Parameter | Symbol | Test Condition (Note 2) | Min | Typical | Max | Units |

Table 4. SKY13415-485LF Control Logic (Note 1)

| Control Pins |  |  | Switched RF Outputs |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $\begin{gathered} \text { V1 } \\ \text { (Pin 7) } \end{gathered}$ | $\begin{gathered} \text { V2 } \\ \text { (Pin 6) } \end{gathered}$ | $\begin{gathered} \text { V3 } \\ (\operatorname{Pin} 5) \end{gathered}$ | $\begin{gathered} \text { RF1 } \\ \text { (Pin 3) } \end{gathered}$ | $\begin{gathered} \text { RF2 } \\ \text { (Pin 9) } \end{gathered}$ | $\begin{gathered} \text { RF3 } \\ \text { (Pin 2) } \end{gathered}$ | $\begin{gathered} \text { RF4 } \\ \text { (Pin 10) } \end{gathered}$ | $\begin{gathered} \text { RF5 } \\ \text { (Pin 1) } \end{gathered}$ | $50 \Omega$ |
| 0 | 0 | 0 | Insertion Loss | Isolation | Isolation | Isolation | Isolation | Isolation |
| 0 | 0 | 1 | Isolation | Insertion Loss | Isolation | Isolation | Isolation | Isolation |
| 0 | 1 | 0 | Isolation | Isolation | Insertion Loss | Isolation | Isolation | Isolation |
| 0 | 1 | 1 | Isolation | Isolation | Isolation | Insertion Loss | Isolation | Isolation |
| 1 | 0 | 0 | Isolation | Isolation | Isolation | Isolation | Insertion Loss | Isolation |
| 1 | 0 | 1 | Isolation | Isolation | Isolation | Isolation | Isolation | $50 \Omega$ |
| 1 | 1 | 0 | Isolation | Isolation | Insertion Loss | Isolation | Insertion Loss | Isolation |
| 1 | 1 | 1 | Shutdown mode |  |  |  |  |  |

Note 1: " 1 " $=1.8 \mathrm{~V}$; " 0 " $=0 \mathrm{~V}$. Any state other than that described in this Table places the switch into an undefined state. An undefined state will not damage the device. Insertion loss in the $\mathrm{V} 1 / 2 / 3=110$ state is 3 dB lower than typical insertion loss with only one arm "on."

## Evaluation Board Description

The SKY13415-485LF Evaluation Board is used to test the performance of the SKY13415-485LF SP5T Switch. An Evaluation Board schematic diagram is provided in Figure 3. An assembly drawing for the Evaluation Board is shown in Figure 4.

## Package Dimensions

The PCB layout footprint for the SKY13415-485LF is provided in Figure 5. Typical case markings are shown in Figure 6. Package dimensions for the 14-pin QFN are shown in Figure 7, and tape and reel dimensions are provided in Figure 8.

## Package and Handling Information

Instructions on the shipping container label regarding exposure to moisture after the container seal is broken must be followed. Otherwise, problems related to moisture absorption may occur when the part is subjected to high temperature during solder assembly.

The SKY13415-485LF is rated to Moisture Sensitivity Level 1 (MSL1) at $260^{\circ} \mathrm{C}$. It can be used for lead or lead-free soldering. For additional information, refer to the Skyworks Application Note, Solder Reflow Information, document number 200164.
Care must be taken when attaching this product, whether it is done manually or in a production solder reflow environment. Production quantities of this product are shipped in a standard tape and reel format.

Detail A
All measurements are in millimeters.
Dimensioning and tolerancing according to ASME Y14.5M-1994.
Coplanarity applies to the terminals and all other bottom surface metalization. Dimension applies to metalized terminal. If the terminal has a radius on its end, the width dimension should not be measured in that radius area.
