0.4 mm Contact Pitch, 1.2 mm above the board, Flexible Printed Circuit ZIF Connectors

FH 27 Series

Overview

Continuous miniaturization of personal mobile devices created a need for a low profile, high density interconnection system. In the same time, the demand for higher currents and higher reliability Flexible Printed Circuits has also increased. Hirose meets all these challenges with introduction of this connector.

Features

1. Low profile, small PCB mounting area, weight reduction Protruding only 1.2 mm above the board the connector occupies 50% less area than comparable type having contacts spaced on 0.5 mm centers. Creative design, coupled with high manufacturing capabilities

2. Higher current carrying capacity

resulted in extremely low weight of the connector.

Contact spacing of 0.4 mm allows production of wider and simpler pattern of conductive traces on FPC.

3. FPC temporary hold and verification of correct insertion The connector has built-in FPC hold protrusions allowing the tactile feel of the correct FPC insertion and holding it in position before closing of the actuator.

4. Uses standard 0.2 mm thick FPC

5. One-finger operation of the actuator

Proven (in several other Hirose's connectors!) Flip-Lock rotating actuator assures reliable mechanical and electrical connection with FPC, confirming it with a definite tactile feel.

6. Board placement with automatic equipment

Flat top surface and packaging on the tape-and reel allows the use of vacuum nozzles.

Standard reel contains 2,500 connectors.

7. Environmental considerations

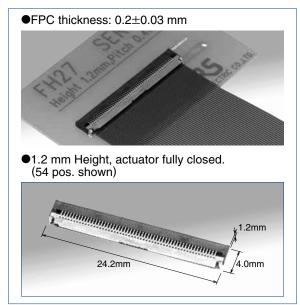

The center cores of the embossed tape reels are made of Styrofoam.

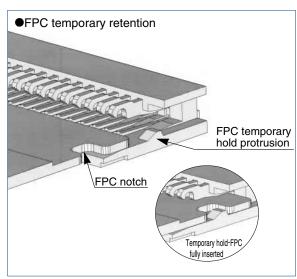

8. Variety of contact positions

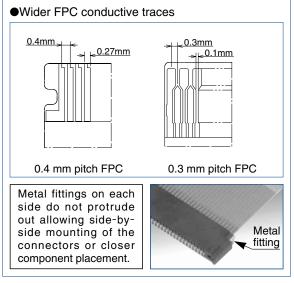

Available with 10, 40, 50,54, 57 and 60 pos.

Applications

Mobile phones, PDA's, digital cameras, digital video cameras, LCD connections, plasma displays (PDP), camera modules and other compact devices requiring Flexible Printed Circuit connections using high reliability ultra-small profile connectors

■Product Specifications

Operating temperature range Storage temperature range Rated current 0.4 A DC(Note 1) -10°C to +50°C (Note 3) -55°C to +85°C (Note 2) Rating Rated voltage 40 V AC Operating humidity range Storage humidity range Relative humidity 90% max. Relative humidity 90% max. (No condensation)

Recommended FPC Thickness: = 0.2 ± 0.03 mm tin-lead plated (Note 3)

Item	Specification	Conditions			
1. Insulation resistance	500 M Ω min.	100 V DC			
2. Withstanding voltage	No flashover or insulation breakdown.	120 V AC /one minute			
3. Contact resistance 100 m Ω max.		1 mA			
	* Including FPC conductor resistance				
4. Durability	Contact resistance: 100 m Ω max.	20 cycles			
(insertion/ withdrawal)	No damage, cracks, or parts dislocation.				
	No electrical discontinuity of 1 μ s or more.	Frequency 10 to FF Hz. single amplitude of 0.75 mm, 10 sycles in			
5. Vibration	Contact resistance: 100 m Ω max.	Frequency: 10 to 55 Hz, single amplitude of 0.75 mm, 10 cycles in each of the 3 directions.			
	No damage, cracks, or parts dislocation.	each of the 3 directions.			
	No electrical discontinuity of 1 μ s. min.	Acceleration of 981 m/s², 6ms duration, sine half-wave			
6. Shock	Contact resistance: 100 m Ω max.				
	No damage, cracks, or parts dislocation.	waveform, 3 cycles / each of 3 axis			
7. Humidity	Contact resistance: 100 m Ω max.	96 hours at 40°C and humidity of 90% to 95%.RH			
	Insulation resistance: 50 M Ω min.				
(Steady state)	No damage, cracks, or parts dislocation.				
	Contact resistance: 100 m Ω max.	Temperature: -55° C $\rightarrow +15^{\circ}$ C to $+35^{\circ}$ C $\rightarrow +85^{\circ}$ C $\rightarrow +15^{\circ}$ C to $+35^{\circ}$ C			
8. Temperature cycle	Insulation resistance: 50 M Ω min.	Time: $30 \rightarrow 2$ to $3 \rightarrow 30 \rightarrow 2$ to 3 (Minutes)			
	No damage, cracks, or parts dislocation.	5 cycles			
9. Resistance to	No deformation of components affecting performance	Reflow: At the recommended temperature profile			
soldering heat	No deformation of components affecting performance.	Manual soldering: 350°C±10°C for 5 seconds			

Note 1: When passing the current through all of the contacts, use 70% of the current rating.

Note 2: Includes temperature rise caused by current flow.

Note 3: The term "storage" refers to products stored for long period of time prior to mounting and use. Operating Temperature Range and Humidity range covers non- conducting condition of installed connectors in storage, shipment or during transportation.

■Materials

Part	Material	Finish	Remarks		
Insulator	LCP	Color: Black	111.041/.0		
Actuator	LCP	Color: Brown	UL94V-0		
Contacts	Phosphor bronze	Gold plated (Note 3)			
Metal fittings	Phosphor bronze	Tin plated			

■Ordering information

0	Series name: FH27	4	Terminal type
2	No. of contacts		SH: SMT horizontal mounting type
	Number of contacts: 10, 40, 50, 54, 57, 60	6	Plating code
3	Contact pitch: 0.4 mm		(05): Gold plated(40,50,60contacts)(RoHS compliant)

Operation and Precautions

Operation

1.FPC insertion procedure. Connector installed on

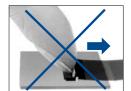

1 Lift up the actuator. Use thumb or index finger.

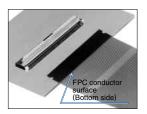

Precautions

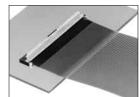

1 Do not apply excessive force or use any type of tool to operate the

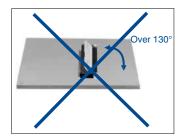

2 Fully insert the FPC in the connector parallel to mounting surface, with the exposed conductive traces facing down.

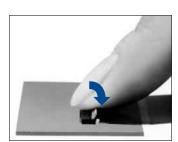

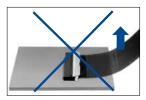

2 The connector will assure reliable performance when the actuator is open to 130° maximum. Do not exceed this angle, as this may cause permanent damage to the connector.

8 Rotate down the actuator until firmly closed. It is critical that the inserted FPC is not moved and remains fully inserted.

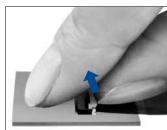

3 Exercise caution when applying upward force to the connected FPC.

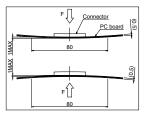

2.FPC removal

1 Lift up the actuator. Carefully withdraw the FPC.

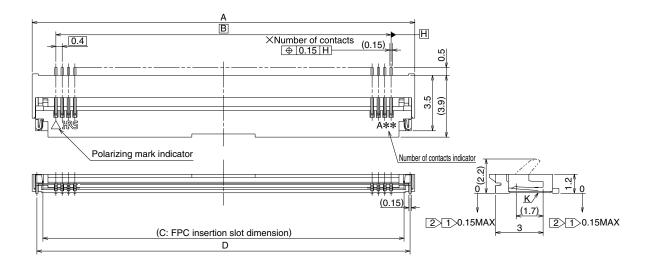

4 The connectors are straight within 0.1 mm max. Make sure that the PC board connector mounting area flatness can accept the connector terminals without causing any failure of the solder joints.

■Connector Dimension

Notes 1 Lead co-planarity including reinforced metal fittings shall be 0.1 MAX.

- 2 The contact terminal lead position indicates the dimension from the K surface, the bottom surface of the insulator body.
- 3 Packaging for this product is embossed carrier tape packaging. Refer to packaging specification.
- 4 Note that preventive hole for sink mark could be added for improvement. The quality remains good, even with the dark spots, which could occasionally occur on molded plastic.
