HRF-SW1020 SP4T Absorptive RF Switch DC To 2.5 GHz Operation

Contact us: sales@integrated-circuit.com Website: www.integrated-circuit.com

The Honeywell HRF-SW1020 is a high performance single pole four throw (SP4T) absorptive RF switch ideal for use in wireless basestation and handset applications that require minimum power and minimum insertion loss.

The HRF-SW1020 is manufactured with Honeywell's patented Silicon On Insulator (SOI) CMOS technology, which provides the performance of GaAs with the economy and integration capabilities of conventional CMOS technology. These switches are DC coupled to improve lower operating frequency, frequency response and reduce the number of DC bias points required.
