Energi To Go®

Instructions

1. Squeeze dark gray buttons at bottom of unit to release cover and gain access to the battery cavity area.
2. Locate battery diagrams on inside body of charger and insert batteries facing opposite directions as indicated by the battery diagrams.
3. Squeeze bottom cover piece and reattach to charger unit.
4. Connect phone-specific connector to charger unit.
5. Connect your phone to the phone-specific connector.
 - Unit will begin flashing within 10 seconds
 - If the unit does not flash, change the batteries.
6. Your phone should indicate that it is charging.
 - The unit will stop flashing when the charging process is complete.
 - For best results do not leave charger connected to phone overnight.
7. To stop charging, remove the connector from the phone.
 - Charger unit will stop flashing within 10 seconds.
8. Charger and batteries may become warm during the charging process.

For maximum charge time, use Energizer® Lithium batteries.

For best results: Charge your phone before its battery becomes fully exhausted.

Do not mix new and old batteries. Do not mix battery chemistries. Remove batteries from charger when not in use for extended periods of time. Do not store batteries in charger.

Caution: Leave charger disconnected for at least 10 minutes before changing batteries.[View Demo](#)
