- This inverter is for Four lamps. It has Dimming function (PWM System) and Remote function.
- This product has shutdown function.
- It prevents from keeping generating the high voltage when the lamps open.(Refer Note.4-3.)
- With lamp failure detector.
  - Normal Operation : CN1-6=0V
  - Some Lamps Open : CN1-6=5V
- This product adjusts the output current for the leakage current.
- The high-voltage area (terminals and patterns) is coated with silicone so as to avoid the defects caused by dust.
- This product is conformity to RoHS directive. ( )
- ( ) Conformity to RoHS Directive: This means that, in conformity with EU Directive 2002/95/EC,
- lead, cadmium, hexavalent chromium, and specific bromine-based flame retardants, PBB
- and PBDE, have not been used, except for exempted applications.

The dimensional deviation not instructed is assumed to be  $\,\pm\,0.3\text{mm}$

Note1-1. Marking of TDK part No, Date code, Country of origin.

TDK part No., Date code, Country of origin, TDK-Lambda Logo, is marked on the transformer.
 Date code example. (ex. Dec.11, 2009)

- Note1-2. For circuit connection, please prefer to test circuit diagram [4].
- Note1-3. Please use minimum of 3mm clearance (all directions) between inverter high voltage area and any conductors. Please refer to mechanical drawing for marking of high voltage area.
- Note1-4. Open voltage (strike voltage) is measured across the transformer secondary winding at no load as the reading at the output connector would be less than the actual value.
- Note1-5. If the start up voltage falls below Cold Cathode Tube strike voltage, the CCFL will not light up easily specially at lower ambient temperature. Please review mounting instruction to avoid any abnormal operation due to coupling/leakage capacitance of inverter high voltage area to any surrounding conductor.

- Note1-6. Please check your lamp characteristic for minimum operational current and set the limit point in your design to avoid flickering and/or abnormal operation.
- Note1-7. For proper operation of circuit protection (fuse or IC PROTECTOR), Please use minimum of 6.3A capacity for input power supply.
- Note1-8. Impedence from the wire connection can cause a ripple in the input. The product has an internal fuse of 3.15A. Please check that input current peak wave form does not exceed 3.15A.
- Note1-9. The cable of hight voltage must not come in contact with a metallic frame.

### [6] Packing and Marking

A shipping box is packaged to avoid from water or damage. Following items are printed on the box.

- 6-1. TDK part No. CXA-0538-A
- 6-2. Manufacture
- 6-3. QTY.

### [7] Others

7-1.Test conditions

Unless otherwise specified, the temperature to be  $(25 \pm 15)$  and humidity to be  $(65 \pm 20)$  %RH.

7-2. Warranty

Warranty shall be for one year after delivery, and those products causing failure during the warranty period and which failures are attributed to the manufacturer's responsibility shall be replaced at no charge.

7-3.Oters

When any doubt arises about this specification, it shall be discussed and decided upon between both parties. Shipment inspection result sheet are subject to change without notice.
