Datasheet of MSO206NR - BUZZ PIEZO CIRC 23MM RADIAL

Contact us: sales@integrated-circuit.com Website: www.integrated-circuit.com

| MALLORY Mallory | y Sonalert Products,Inc. | Part #: | MSO206NR |
|-----------------------|-------------------------------|-----------|---------------|
| Sales | Outline Drawing | Revision: | D |
| Specifications: | | | |
| Sound Level Category | Loud | | |
| Mode of Operation | Continuous | | |
| Voltage Rating | 2 to 6 VDC | | |
| Frequency | 3500 ± 500 Hz | | |
| Loudness @ 1 FT | 90 to 99 dB(A) Typ. | | |
| Current Draw | 30mA MAX | | |
| Housing Material | Valox (UL94V-0), Color: Black | | |
| Storage Temperature | -30° to +70° C | | |
| Operating Temperature | -20° to +65° C | | |
| Weight (Typical) | 3.5g | | |
| Options | Please contact factory. | | |
| Dimensions: Inches | (mm) | | ROHS Complian |

EMISSION HOLE

NOTE B: MOUNTING- INSERT INTO PRINTED CIRCUIT BOARD AND HAND OR MACHINE SOLDER. UNITS ARE SUITABLE FOR WAVE SOLDERING. RECOMMENDED MAXIMUM TEMPERATURE AND TIME DURATION FOR WAVE SOLDERING IS +270°C AND 3 SECONDS RESPECTIVELY.

MSR & MSO Series Buzzers

Aqueous Wash:

In order to process MSR & MSO Series buzzers through an aqueous wash, the buzzer must have a wash label and be sealed on the back with epoxy. Sealed buzzers have a "SR" suffix in the part number. For example, P/N MSR320SR is sealed and appropriate for aqueous wash. P/N MSR320R is not sealed.

After aqueous wash, the wash label must be removed from the buzzer.

Wave Solder Profile:

Refer to the wave solder machine manufacturer's recommended wave solder profile. If needed, adjust the maximum time & temperature to 270°C for 3 seconds to process MSR & MSO series buzzers.

Moisture Sensitivity Level (MSL): Level 1 (Unlimited)

Packaging: All parts are bulk packed.

Origin: Made in USA

Sound Level vs Distance:

Sound level decreases as the sound waves travel over distance, so it is important to note the specified distance when comparing sound levels. For example, if a buzzer measures 88 decibels (dB) at 30 cm, then it will measure:

97 dB @ 10 cm

82 dB @ 60 cm

78 dB @ 1 Meter

Mallory Sonalert has developed a tool to help convert sound levels depending on the distance. You can download the tool from our website: http://www.mallory-sonalert.com/PerformanceCurves/Sound%20Level%20Distance%20Conversion%2 OTool.xls
