64000-0041 Manual Press

## Operating Instruction Sheet For 64000-0041 (Manual Press) For SC Power Connector Product No. 19403-0011

#### **FEATURES**

- Ratchet mechanism to insure full stroke.
- Adjustable termination height.
- Reversible for right or left hand operation.
- Dedicated tooling for quality assembly.

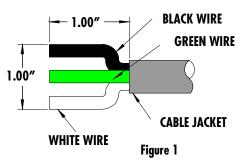

#### **SCOPE**

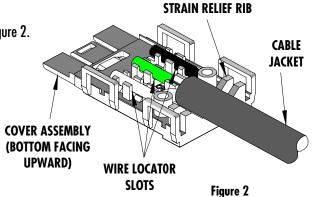

Self-Contained Power Connector Assembly for 14 AWG stranded wire. This connector is designed exclusively for Coleman Cable E54864-H SEOPRENE 105 14 AWG 3/C SEOOW (UL) 600 V. —50°C to 105°C CSA LL39753-H STOOW (TPE).

#### **OPERATION**

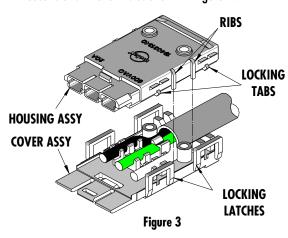

1. Strip cable jacket and pre-form the wires as shown in Figure 1.

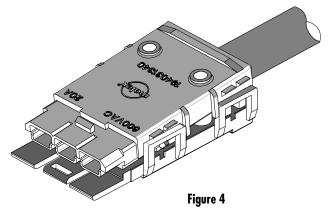

2. Position the clear cover (bottom facing upward) as shown in Figure 2.

3. Position wires into locator slots. Be certain to place black wire in slot marked BLK, green wire in slot marked GRD, and the white wire in the third slot. Upon final positioning of all wires, be certain the end of the cable jacket is a minimum of .06" past the second strain relief rib as shown in Figure 2.

#### 64000-0041 Manual Press

- Position the housing assembly over the cover with the ribs in the housing aligned between the latches as shown in Figure 3. Push the two halves together until the locking tabs engage as shown in Figure 4.
- 5. Place the connector assembly on the anvil. Position the connector mounting holes onto the locator pins as shown in Figure 5.
- 6. With connector in position as shown in Figure 6, pull the ram handle from the full up position to the full down position and return.
- Remove terminated connector assembly by lifting straight up to disengage connector from locator pins.
