### Description

The Quasar UK FM hybrid transmitter module provides a complete RF transmitter which can be used to transmit data at up to 4.8Kbps from any standard CMOS/TTL source.

The module is very simple to operate and offers low current consumption (typ. 15mA). Data can be supplied directly from a microprocessor or encoding device, thus keeping the component count down and ensuring a low hardware cost.

The modules are compatible with the Quasar UK Ltd. range of FM receivers to provide a complete wireless solution.

### Typical Application

For further information on this circuit please refer to the RF Solutions Ltd datasheet, DS600.

### Part Numbering

Part Number	Description
QFM-TX1-433	FM Transmitter Module, 433MHz

\*Range stated is for modules used in direct line of sight, adverse conditions may reduce the maximum range.
