PT7M8216

300mA, High PSRR, Tiny package, LDO Regulator

Features

- Input Voltage Range: 1.7V to 5.5V
- 300mA Guaranteed Output Current
- Stable with 0.47 μ F Ceramic Output Capacitors
- Low Dropout Voltage 150mV@150mA ($V_{out}=2.8V$)
- Low Quiescent Current 36 μ A
- High PSRR 75dB@1kHz
- Auto Output Discharge
- High Output Accuracy $\pm 2\%$ Initial Accuracy
- Thermal Shutdown and Current Limit Protection
- Operating Temperature Range: -40 °C to +85 °C
- Packaging (Pb-free & Green):
 - 4-pin UDFN 1mm×1mm
 - 4-pin UDFN 0.8mm×0.8mm

Description

PT7M8216 is a high accurate, low dropout voltage regulator with low noise, high ripple rejection and low current consumption.

PT7M8216 includes a reference voltage source, an error amplifier, a driver transistor, a current limit protection, a thermal protection and an internal phase compensator.

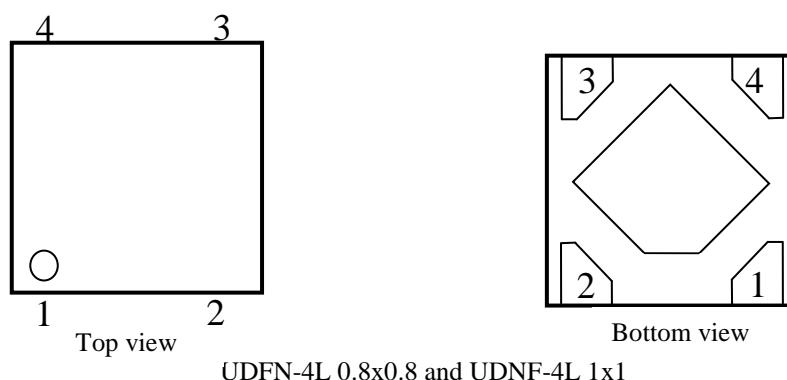

The output voltage for the regulator is set by factory trimming within a range of 0.9V to 3.3V in 100mV step includes 2.85V. PT7M8216 is stable with low ESR ceramic capacitors.

PT7M8216 is available in a 1mm×1mm UDFN-4L and 0.8mm×0.8mm UDFN-4L packages. It operates over a temperature range of -40 to +85 °C.

Applications

- Cell Phones
- Mobile Phones (PDC, GSM, CDMA, IMT2000 etc.)
- Cordless Phones and Radio Communication
- Digital Still Cameras and Video Cameras
- PDA
- MP3 Players
- Portable Devices

Pin Assignment

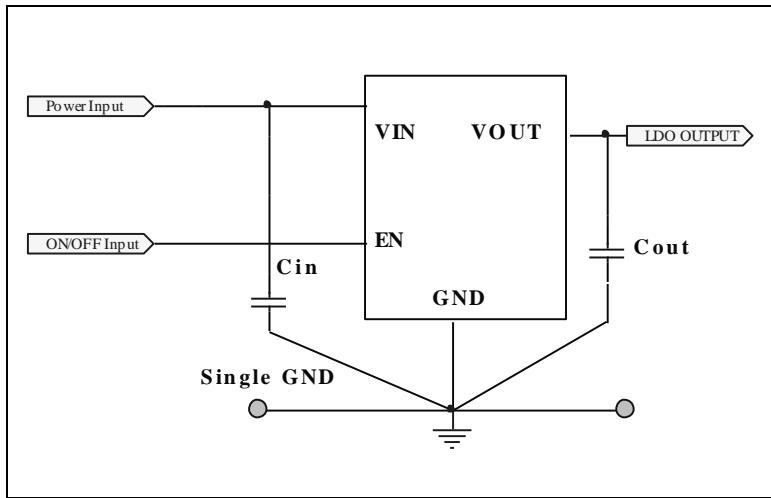

Pin Description

Pin No	I/O	Pin Name	Description
4	I	VIN	Regulator Supply Input. Supply voltage can range from 1.7V to 5.5V. Bypass with a 0.47 μ F ceramic capacitor (X5R/X7R) to GND.
2	P	GND	Ground.
3	I	EN	ON/OFF Control of Regulator. High active.
5	-	NC	This pin is better to be connected to the GND, but leaving it open is also acceptable
1	O	VOUT	Output of Regulator. Bypass with a 0.47 μ F ceramic capacitor (X5R/X7R) to GND.

Block Diagram

Functional Description (Refer to Block Diagram)

Output Voltage

The divided output voltage is compared with the internal reference voltage by the error amplifier with internal phase compensator. The output of the error amplifier then drives the P-channel MOSFET to maintain a stable and constant output voltage.

Low ESR Capacitors

The internal phase compensator maintains the stable output voltage with low ESR ceramic input and output capacitors. 0.47 μ F low ESR (X5R/X7R) ceramic capacitor located as close as possible to the IC's pins is recommended.

Current Limit and Thermal Shutdown Protections

Current limit protection is used to limit the output current when an overload condition occurs. As a result, the output voltage will drop. Thermal shutdown protection will turn off the output to reduce the power dissipation when the operation junction temperature exceeds 170 °C.

EN Pin

The output of the regulator in PT7M8216 can be controlled with EN pin. The EN pin should be connected to a "VIN" or a "GND" voltage as a floating input applied to inverter input of the enable circuitry will increase the current consumption.

NOTE ON USE

Please use this IC within the stated absolute maximum ratings.

Where wiring impedance is high, operations may become unstable due to noise and/or phase lag depending on output current.

Please keep the resistance low between VIN and GND wiring in particular.

Please wire the input capacitor (Cin) and the output capacitor (Cout) as close to the IC as possible.

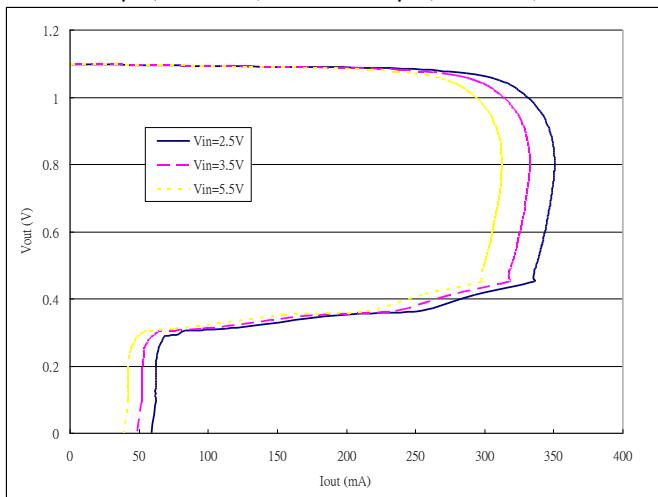

**PT7M8216****300mA, High PSRR, Tiny package, LDO Regulator**

Typical Performance Characteristics

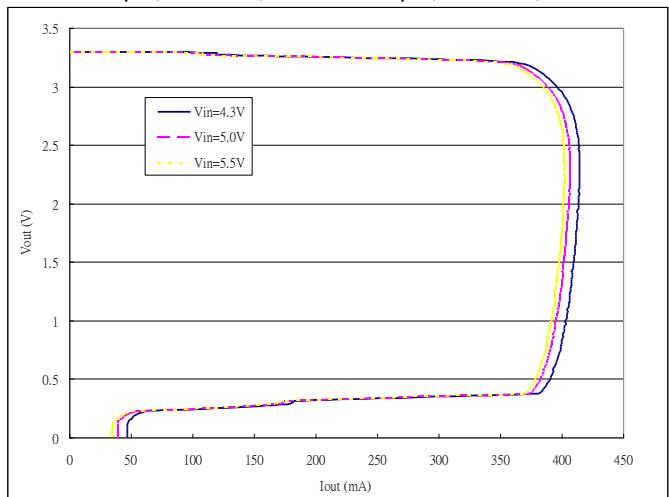

1. Output Voltage vs. Output Current

PT7M8216B (1.1V)

Cin=0.47 µF(Ceramics), Cout=0.47 µF(Ceramics), TA=25 °C

**PT7M8216B (3.3V)**

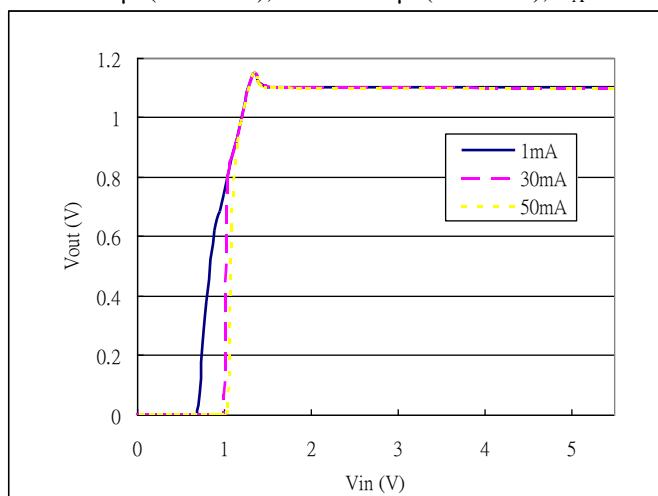

Cin=0.47 µF(Ceramics), Cout=0.47 µF(Ceramics), TA=25 °C

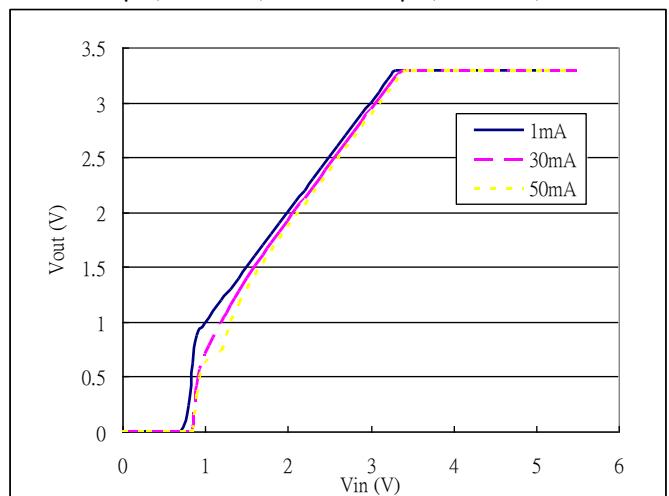

2. Output Voltage vs. Input Voltage

PT7M8216 (1.1V)

Cin=0.47 µF(Ceramics), Cout=0.47 µF(Ceramics), TA=25 °C

**PT7M8216B (3.3V)**

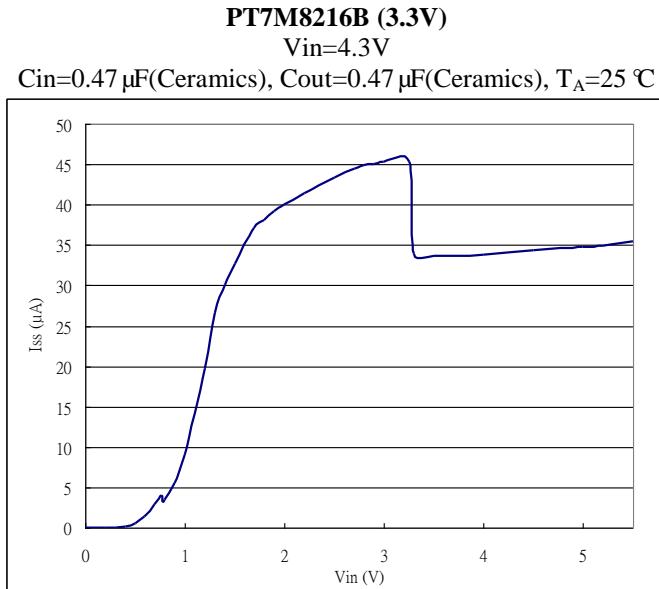

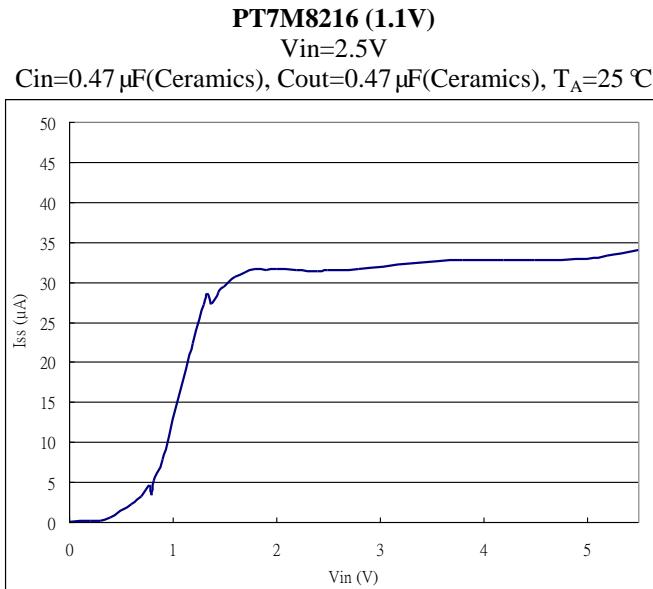

Cin=0.47 µF(Ceramics), Cout=0.47 µF(Ceramics), TA=25 °C

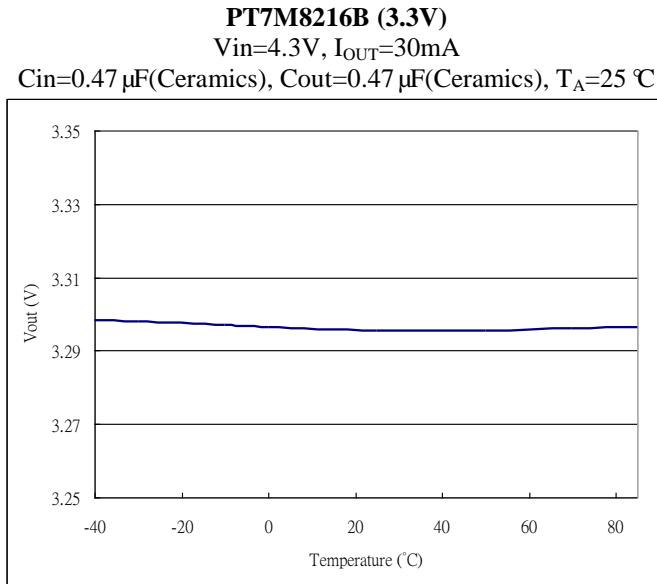

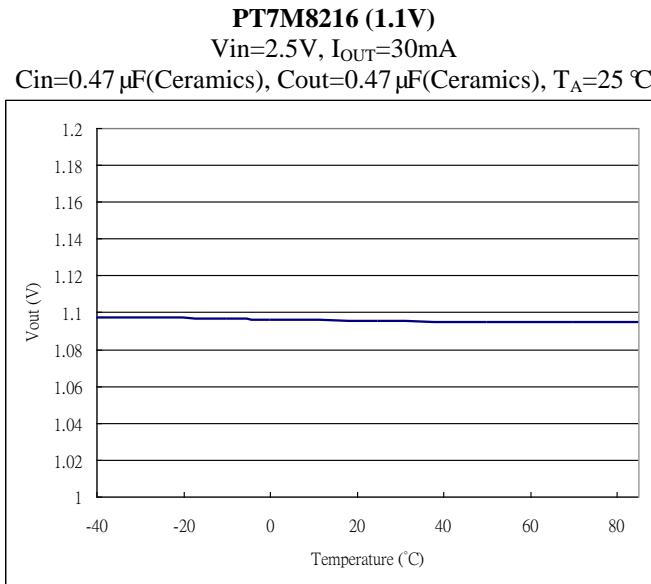

PT7M8216
300mA, High PSRR, Tiny package, LDO Regulator

3. Supply Current vs. Input Voltage

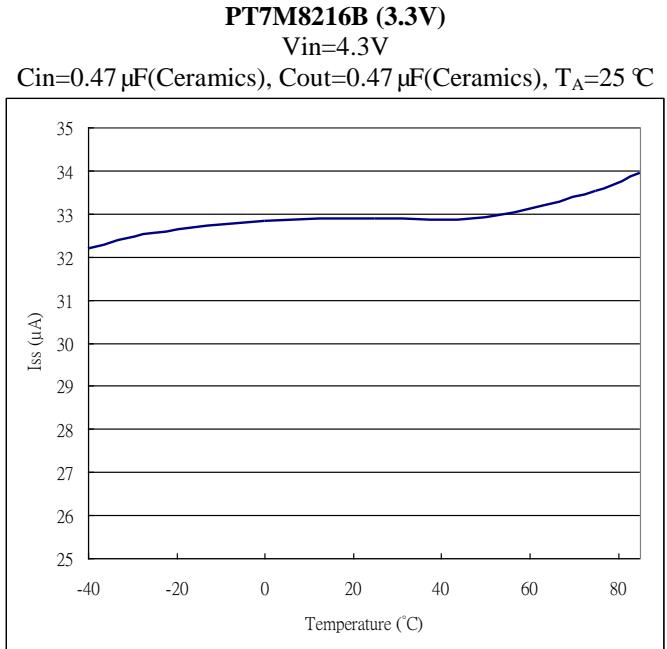

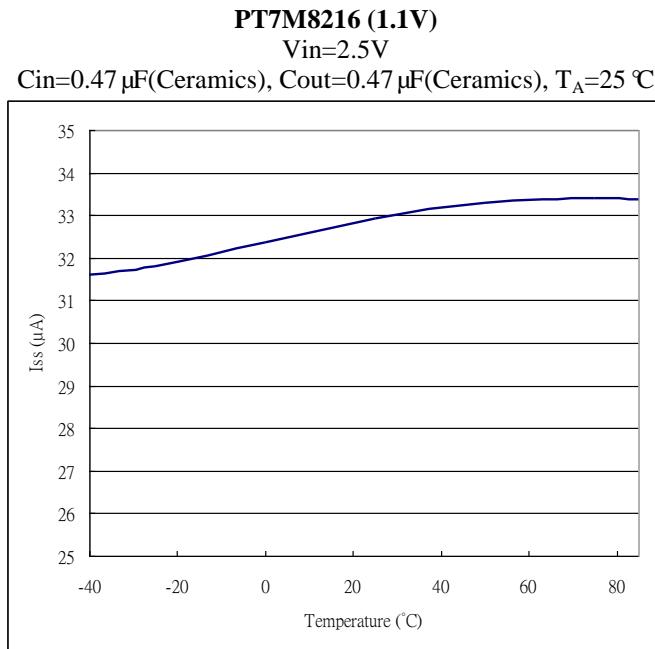

4. Output Voltage vs. Ambient Temperature

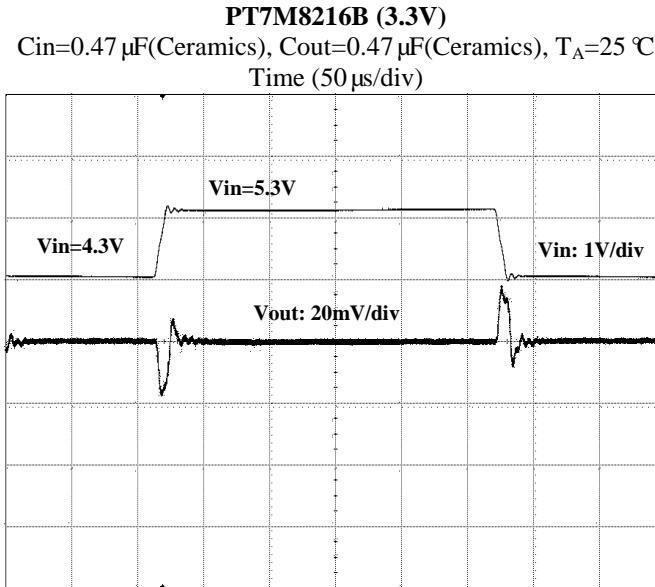

PT7M8216
300mA, High PSRR, Tiny package, LDO Regulator

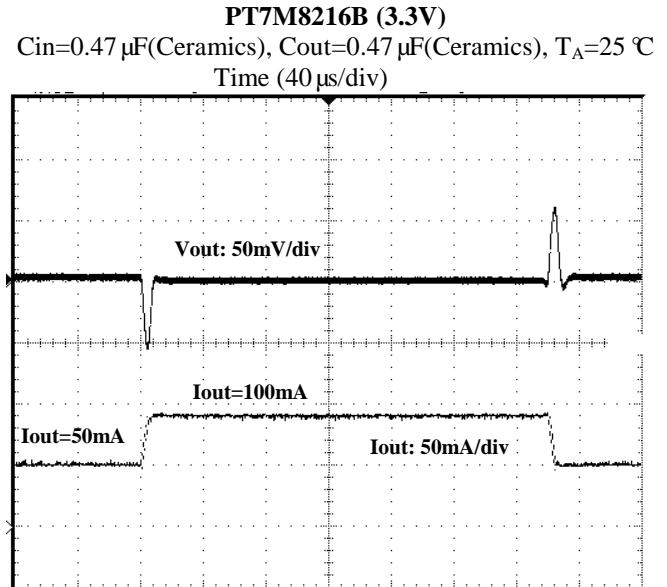

5. Supply Current vs. Ambient Temperature

6. Line Transient Response

7. Load Transient Response

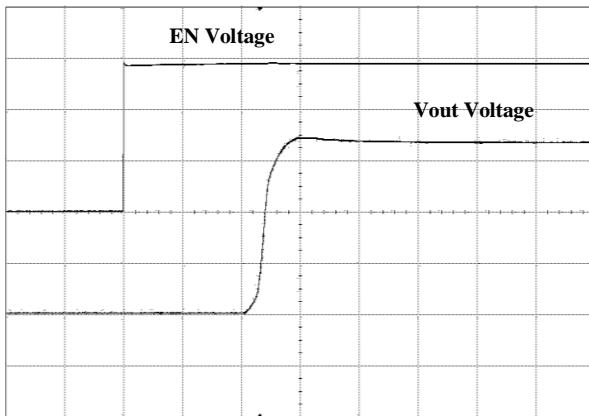

PT7M8216

300mA, High PSRR, Tiny package, LDO Regulator

8. Turn On Speed with EN pin

PT7M8216B (3.3V)

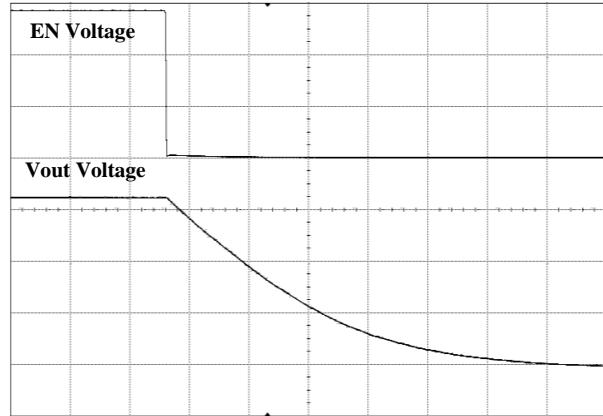

$C_{in}=0.47\ \mu F$ (Ceramics), $C_{out}=0.47\ \mu F$ (Ceramics), $T_A=25\ ^\circ C$
 Time (20 μs /div)

9. Turn Off Speed with EN pin

PT7M8216B (3.3V)

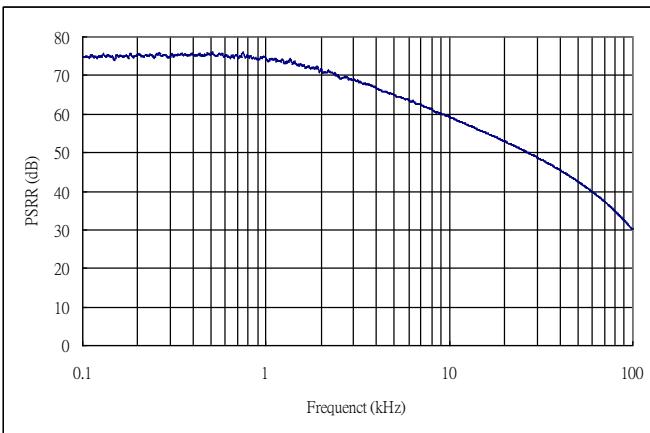

$C_{in}=0.47\ \mu F$ (Ceramics), $C_{out}=0.47\ \mu F$ (Ceramics), $T_A=25\ ^\circ C$
 Time (20 μs /div)

10. PSRR

PT7M8216 (0.9V)

$V_{in}=3.0V$ DC+0.2Vp-pAC
 $C_{out}=0.47\mu F$ (Ceramics), $I_{out}=30mA$

Ordering Information

Part Number	Package Code	Package Description	Top Marking
PT7M8216B①②XZEX	XZ	Lead Free and Green UDFN-4 1mmx1mm (XZ), Tape & Real	See below Table1
PT7M8216B①②XYEX	XY	Lead Free and Green UDFN-4 0.8mmx0.8mm (XY), Tape & Real	See below Table1

Notes:

- E = Pb-free and Green
- Adding X Suffix= Tape/Reel
- “B” of PT7M8216B①② means high active for control pin “EN”
- “①②” refer to different output voltage. See below Table1
- Contact Pericom for availability.

Table1 Sequential Number Description

Designator ①②	VOUT (V)	Designator ①②	VOUT (V)	Designator ①②	VOUT (V)
09	0.9	18	1.8	27	2.7
10	1.0	19	1.9	28	2.8
11	1.1	20	2.0	29	2.9
12	1.2	21	2.1	30	3.0
