

Product Data Sheet LTST-G683RGBW

Spec No.: DS22-2011-0302

Effective Date: 09/26/2014

Revision: A

LITE-ON DCC

RELEASE

BNS-OD-FC001/A4

Features

- * Meet ROHS, Green Product.
- * Package in 8mm tape on 7" diameter reels.
- * EIA STD package.
- * I.C. compatible.
- * Compatible with automatic placement equipment.
- * Compatible with infrared and reflow solder process.

Package Dimensions

Part No.	Lens Color	Source Color	Pin Assignment
LTST-G683RGBW	Diffused lens	InGaN Blue	1, 6
		InGaN Green	2, 5
		AlInGaP Red	3, 4

Notes:

1. All dimensions are in millimeters (inches).
2. Tolerance is ± 0.2 mm (.008") unless otherwise noted.

Absolute Maximum Ratings at Ta=25°C

Parameter	LTST-G683RGBW			Unit
	Red	Green	Blue	
Power Dissipation	72	80	80	mW
Peak Forward Current (1/10 Duty Cycle, 0.1ms Pulse Width)	80	100	100	mA
DC Forward Current	30	20	20	mA
Operating Temperature Range	-40°C to + 85°C			
Storage Temperature Range	-40°C to + 100°C			

Suggest IR Reflow Condition For Pb Free Process:

IR-Reflow Soldering Profile for lead free soldering (Acc. to J-STD-020B)

Electrical / Optical Characteristics at Ta=25°C

Parameter	Symbol	LTST-G683RGBW			Unit	Test Condition	
		Red	Green	Blue			
Luminous Intensity	IV	MIN.	90	355	180	mcd	IF = 20mA Note 1
		TYP.	-	-	-		
		MAX.	224	710	355		
Viewing Angle	2θ _{1/2}	TYP.	120			deg	Note 2 (Fig.5)
Peak Emission Wavelength	λ _P	TYP.	639	518	465	nm	Measurement @Peak (Fig.1)
Dominant Wavelength	λ _d	MIN.	624	520	465	nm	Note 3
		TYP.	-	-	-		
		MAX.	636	530	475		
Spectral Line Half-Width	Δλ	TYP.	20	35	25	nm	
Forward Voltage	VF	MIN.	1.8	2.8	2.8	V	IF = 20mA Note. 4
		TYP.	-	-	-		
		MAX.	2.4	3.8	3.8		
Reverse Current	IR	MAX.	10	10	10	μA	VR = 5V Note 5

NOTE: 1. Luminous intensity is measured with a light sensor and filter combination that approximates the CIE eye-response curve.

2. θ 1/2 is the off-axis angle at which the luminous intensity is half the axial luminous intensity.

3. The dominant wavelength, λ d is derived from the CIE chromaticity diagram and represents the single wavelength which defines the color of the device.

4. Forward Voltage Tolerance is +/- 0.1 volt

5. Reverse voltage (VR) condition is applied to IR test only. The device is not designed for reverse operation..

Bin Code List

Bin Code	Luminous Intensity		Unit : mcd @20mA			
	Red	Green	Blue		Min	Max
Min	Min	Min	Min	Min	Max	
A1	90	355	450	140	180	
A2				180	224	
A3				224	280	
A4				280	355	
A5		450	560	140	180	
A6				180	224	
A7				224	280	
A8				280	355	
A9		560	710	140	180	
A10				180	224	
A11				224	280	
A12				280	355	
B1	112	355	450	140	180	
B2				180	224	
B3				224	280	
B4				280	355	
B5		450	560	140	180	
B6				180	224	
B7				224	280	
B8				280	355	
B9		560	710	140	180	
B10				180	224	
B11				224	280	
B12				280	355	

Tolerance on each Intensity bin is +/-11%

Bin Code List

Bin Code	Luminous Intensity		Unit : mcd @20mA			
	Green	Red	Blue		Min	Max
	Min	Min	Min	Min	Min	Max
C1	140	355	450	140	180	
C2				180	224	
C3				224	280	
C4				280	355	
C5		450	560	140	180	
C6				180	224	
C7				224	280	
C8				280	355	
C9		560	710	140	180	
C10				180	224	
C11				224	280	
C12				280	355	
D1	180	355	450	140	180	
D2				180	224	
D3				224	280	
D4				280	355	
D5		450	560	140	180	
D6				180	224	
D7				224	280	
D8				280	355	
D9		560	710	140	180	
D10				180	224	
D11				224	280	
D12				280	355	

Tolerance on each Intensity bin is +/-11%

Bin Code List

Bin Code	Dominant Wavelength		Unit : nm @ 20mA			
	Red	Green	Blue		Min	Max
Min	Max	Min	Max	Min	Max	
E1	624	520	525	465	470	
E2				470	475	
E3		525	530	465	470	
E4				470	475	

Tolerance for each Dominate Wavelength Bin is +/- 1nm

User Guide

Cleaning

Do not use unspecified chemical liquid to clean LED they could harm the package.

If cleaning is necessary, immerse the LED in ethyl alcohol or isopropyl alcohol at normal temperature for less one minute.

Recommend Printed Circuit Board Attachment Pad

Package Dimensions Of Tape And Reel

Note:

1. All dimensions are in millimeters (inches).

Package Dimensions of Reel**Notes:**

1. Empty component pockets sealed with top cover tape.
2. 7 inch reel-2000 pieces per reel.
3. Minimum packing quantity is 500 pieces for remainders.
4. The maximum number of consecutive missing lamps is two.
5. In accordance with EIA-481-1-B specifications.

CAUTIONS**1. Application**

The LEDs described here are intended to be used for ordinary electronic equipment (such as office equipment, communication equipment and household applications). Consult Liteon's Sales in advance for information on applications in which exceptional reliability is required, particularly when the failure or malfunction of the LEDs may directly jeopardize life or health (such as in aviation, transportation, traffic control equipment, medical and life support systems and safety devices).

2. Storage

The package is sealed:

The LEDs should be stored at 30°C or less and 70% RH or less. And the LEDs are limited to use within one year, while the LEDs is packed in moisture-proof package with the desiccants inside.

The package is opened:

The storage ambient for the LEDs should not exceed 30°C temperature and 60% relative humidity.

It is recommended that LEDs out of their original packaging are IR-reflowed within 168hrs.

For extended storage out of their original packaging, it is recommended that the LEDs be stored in a sealed container with appropriate desiccant, or in a desiccators with nitrogen ambient.

LEDs stored out of their original packaging for more than 168hrs should be baked at about 60 deg C for at least 48 hours before solder assembly.

3. Cleaning

Use alcohol-based cleaning solvents such as isopropyl alcohol to clean the LED if necessary.

4. Soldering

Recommended soldering conditions:

Reflow soldering		Soldering iron	
Pre-heat	150~200°C	Temperature	300°C Max.
Pre-heat time	120 sec. Max.	Soldering time	3 sec. Max.
Peak temperature	260°C Max.		(one time only)
Soldering time	10 sec. Max.(Max. two times)		

Soldering notes:

Because different board designs use different number and types of devices, solder pastes, reflow ovens, and circuit boards, no single temperature profile works for all possible combinations.

However, you can successfully mount your packages to the PCB by following the proper guidelines and PCB-specific characterization.

LITE-ON Runs both component-level verification using in-house **KYRAMX98** reflow chambers and board-level assembly.

The results of this testing are verified through post-reflow reliability testing.

Profiles used at LITE-ON are based on JEDEC standards to ensure that all packages can be successfully and reliably surface mounted.

Figure on page3 shows a sample temperature profile compliant to JEDEC standards.

You can use this example as a generic target to set up your reflow process.

You should adhere to the JEDEC profile limits as well as specifications and recommendations from the solder paste manufacturer to avoid damaging the device and create a reliable solder joint.

5. Drive Method

An LED is a current-operated device. In order to ensure intensity uniformity on multiple LEDs connected in parallel in an application, it is recommended that a current limiting resistor be incorporated in the drive circuit, in series with each LED as shown in Circuit A below.

Circuit model A**Circuit model B**

(A) Recommended circuit.

(B) The brightness of each LED might appear different due to the differences in the I-V characteristics of those LEDs.

6. ESD (Electrostatic Discharge)

Static Electricity or power surge will damage the LED.

Suggestions to prevent ESD damage:

- Use of a conductive wrist band or anti-electrostatic glove when handling these LEDs.
- All devices, equipment, and machinery must be properly grounded.
- Work tables, storage racks, etc. should be properly grounded.
- Use ion blower to neutralize the static charge which might have built up on surface of the LED's plastic lens as a result of friction between LEDs during storage and handling.

ESD-damaged LEDs will exhibit abnormal characteristics such as high reverse leakage current, low forward voltage, or "no lightup" at low currents.

To verify for ESD damage, check for "lightup" and V_f of the suspect LEDs at low currents.

The V_f of "good" LEDs should be $>2.0V@0.1mA$ for InGaN product and $>1.4V@0.1mA$ for AlInGaP product.

7. Reliability Test

No.	Test item	Test condition	Reference standard
1	Resistance to soldering heat	Tsld = 260°C, 10sec. 3 times	JEITA ED-4701 300 301
2	Solderability	Tsld=245± 5°C (Lead Free Solder, Coverage \geq 95% of the dipped surface)	JEITA ED-4701 300 303
3	Thermal Shock	85 ± 5°C ~ -30°C ± 5°C 30min 30min 100cycles	JEITA ED-4701 300 307
4	Temperature Cycle	-55°C ~ 25°C ~ 100°C ~ 25°C 30min 5min 30min 5min 100cycles	JEITA ED-4701 100 105
5	High Temperature Storage	100°C 1000hrs	JEITA ED-4701 200 201
6	Low Temperature Storage	-55°C 1000hrs	JEITA ED-4701 200 202
7	Temperature Humidity Storage	60°C/90% RH 300hrs	JEITA ED-4701 100 103
8	Room temp life test	25°C, IF: Max current , 1000hrs	--

8. Others

The appearance and specifications of the product may be modified for improvement without prior notice.

9. Suggested Checking List**Training and Certification**

1. Everyone working in a static-safe area is ESD-certified?
2. Training records kept and re-certification dates monitored?

Static-Safe Workstation & Work Areas

1. Static-safe workstation or work-areas have ESD signs?
2. All surfaces and objects at all static-safe workstation and within 1 ft measure less than 100V?
3. All ionizer activated, positioned towards the units?
4. Each work surface mats grounding is good?

Personnel Grounding

1. Every person (including visitors) handling ESD sensitive (ESDS) items wears wrist strap, heel strap or conductive shoes with conductive flooring?
2. If conductive footwear used, conductive flooring also present where operator stand or walk?
3. Garments, hairs or anything closer than 1 ft to ESD items measure less than 100V*?
4. Every wrist strap or heel strap/conductive shoes checked daily and result recorded for all DLs?
5. All wrist strap or heel strap checkers calibration up to date?

Note: *50V for Blue LED.

Device Handling

1. Every ESDS items identified by EIA-471 labels on item or packaging?
2. All ESDS items completely inside properly closed static-shielding containers when not at static-safe workstation?
3. No static charge generators (e.g. plastics) inside shielding containers with ESDS items?
4. All flexible conductive and dissipative package materials inspected before reuse or recycles?

Others

1. Audit result reported to entity ESD control coordinator?
2. Corrective action from previous audits completed?
3. Are audit records complete and on file?
