Vishay High Power Products

HEXFRED® Ultrafast Soft Recovery Diode, 2 x 4 A

D²PAK

| PRODUCT SUMMARY | | | | |
|--------------------------------|----------|--|--|--|
| V_{R} | 600 V | | | |
| V _F at 4 A at 25 °C | 1.8 V | | | |
| I _{F(AV)} | 2 x 4 A | | | |
| t _{rr} (typical) | 17 ns | | | |
| T _J (maximum) | 150 °C | | | |
| Q _{rr} | 40 nC | | | |
| dl _{(rec)M} /dt | 280 A/μs | | | |

FEATURES

- Ultrafast recovery
- · Ultrasoft recovery
- Very low I_{RRM}
- Very low Q_{rr}
- · Specified at operating conditions
- · Designed and qualified for industrial level

BENEFITS

- · Reduced RFI and EMI
- · Reduced power loss in diode and switching transistor
- · Higher frequency operation
- · Reduced snubbing
- Reduced parts count

DESCRIPTION

HFA08TA60CS is a state of the art center tap ultrafast recovery diode. Employing the latest in epitaxial construction and advanced processing techniques it features a superb combination of characteristics which result in performance which is unsurpassed by any rectifier previously available. With basic ratings of 600 V and 4 A per leg continuous current, the HFA08TA60CS is especially well suited for use as the companion diode for IGBTs and MOSFETs. In addition to ultrafast recovery time, the HEXFRED® product line features extremely low values of peak recovery current (I_{RRM}) and does not exhibit any tendency to "snap-off" during the t_b portion of recovery. The HEXFRED features combine to offer designers a rectifier with lower noise and significantly lower switching losses in both the diode and the switching transistor. These HEXFRED advantages can help to significantly reduce snubbing, component count and heatsink sizes. The HEXFRED HFA08TA60CS is ideally suited for applications in power supplies and power conversion systems (such as inverters), motor drives, and many other similar applications where high speed, high efficiency is needed.

| ABSOLUTE MAXIMUM RATINGS | | | | | |
|--|-------------------|-------------------------|---------------|-------|--|
| PARAMETER | SYMBOL | TEST CONDITIONS | VALUES | UNITS | |
| Cathode to anode voltage | V_{R} | | 600 | V | |
| Maximum continuous forward current per leg | - I _F | T _C = 100 °C | 4 | | |
| per device | | | 8 | Α | |
| Single pulse forward current | I _{FSM} | | 25 | A | |
| Maximum repetitive forward current | I _{FRM} | | 16 | | |
| Maximum power dissipation | P _D | T _C = 25 °C | 25 | W | |
| waximum power dissipation | | T _C = 100 °C | 10 | VV | |
| Operating junction and storage temperature range | T_J , T_{Stg} | | - 55 to + 150 | °C | |
