DIFFERENTIAL VIDEO AMPLIFIER

FEATURES

- **Adjustable Gain to 400 (Typ)**
- **No Frequency Compensation Required**
- **Low Noise . . . 3-mV V_n (Typ)**

DESCRIPTION

This device is a monolithic two-stage video amplifier with differential inputs and differential outputs. It features internal series-shunt feedback that provides wide bandwidth, low phase distortion, and excellent gain stability. Emitter-follower outputs enable the device to drive capacitive loads. All stages are current-source biased to obtain high common-mode and supply-voltage rejection ratios.

The differential gain is typically 400 when the gain adjust pins are connected together, or amplification may be adjusted for near 0 to 400 by the use of a single external resistor connected between the gain adjustment pins A and B. No external frequency-compensating components are required for any gain option.

The device is particularly useful in magnetic-tape or disk-file systems using phase or NRZ encoding and in high-speed thin-film or plated-wire memories. Other applications include general-purpose video and pulse amplifiers.

The device achieves low equivalent noise voltage through special processing and a new circuit layout incorporating input transistors with low base resistance.

The TL592B is characterized for operation from 0°C to 70°C.

D8, P, OR PS PACKAGE

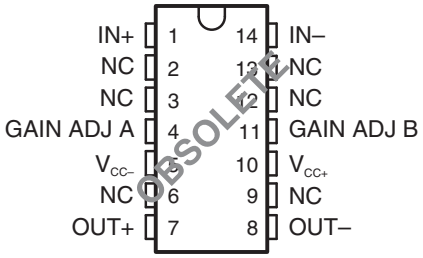
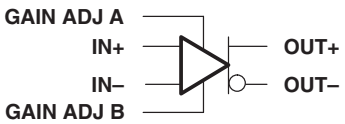
D14 OR N PACKAGE
(TOP VIEW)

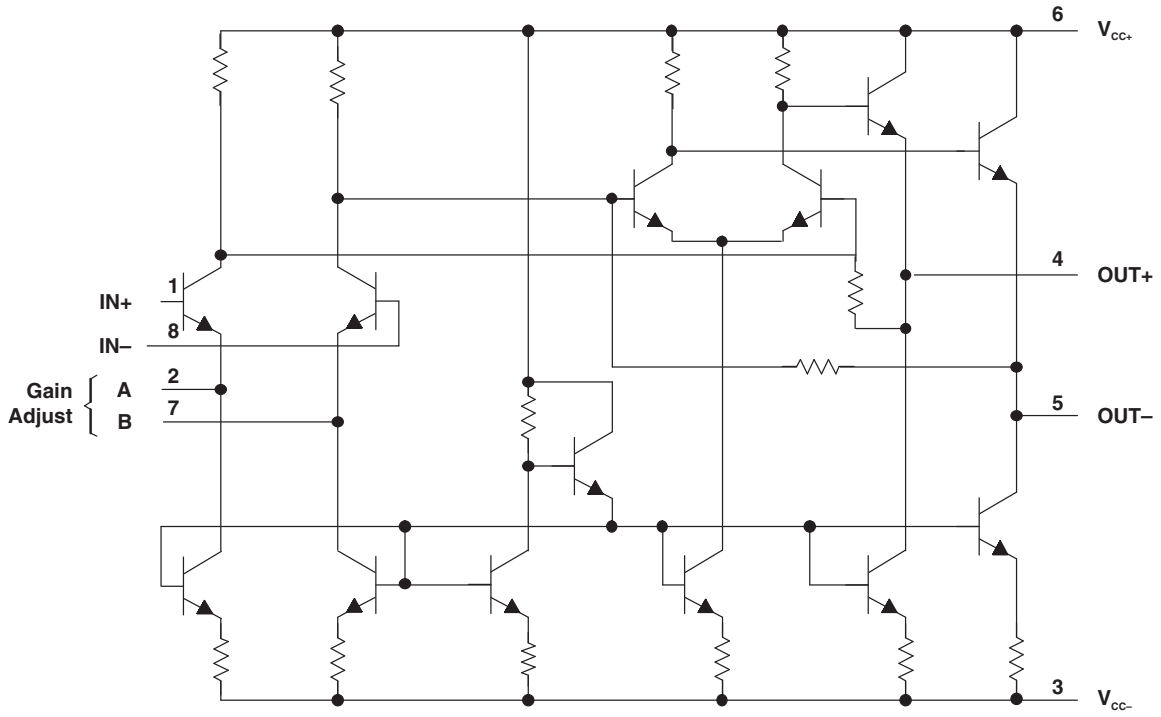


NC – No internal connection
Note: D8 and D14 are the codes to differentiate the 8-pin and 14-pin versions, respectively.

SYMBOL



SCHEMATIC



NOTE: Pin numbers shown are for D, P, and PS packages.

ABSOLUTE MAXIMUM RATINGS(1)(2)

over operating free-air temperature range (unless otherwise noted)

V_{CC+}	Positive supply voltage	8 V
$V_{CC–}$	Negative supply voltage	–8 V
V_{DI}	Differential input voltage	±5 V
V_I	Voltage range, any input	V_{CC+} to $V_{CC–}$
I_O	Output current	10 mA
P_D	Continuous total power dissipation	See Dissipation Rating Table
T_A	Operating free-air temperature range	0°C to 70°C
T_{stg}	Storage temperature range	–65°C to 150°C
T_{lead}	Lead temperature 1,6 mm (1/16 inch) from case for 10 seconds	260°C

(1) Stresses beyond those listed under *absolute maximum ratings* may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under *recommended operating conditions* is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.
(2) All voltage values except differential input voltages are with respect to the midpoint between V_{CC+} and $V_{CC–}$.

DISSIPATION RATINGS

PACKAGE	$T_A \le 25°C$ POWER RATING	DERATING FACTOR	DERATE ABOVE T_A	$T_A = 70°C$ POWER RATING
D8	530 mW	5.8 mW/°C	59	464 mW
D14	530 mW	N/A	N/A	530 mW
N	530 mW	N/A	N/A	530 mW
P	530 mW	N/A	N/A	530 mW
PS	530 mW	N/A	N/A	530 mW

RECOMMENDED OPERATING CONDITIONS

		MIN	NOM	MAX	UNIT
V_{CC+}	Positive supply voltage	3	6	8	V
V_{CC-}	Negative supply voltage	–3	–6	–8	V
T_A	Operating free-air temperature	0		70	°C

ELECTRICAL CHARACTERISTICS

at specified free-air temperature, $V_{CC\pm}$ = ±6 V, R_L = 2 kΩ (unless otherwise noted)

PARAMETER		TEST FIGURE	TEST CONDITIONS(1)		T_A	MIN	TYP	MAX	UNIT
A_{VD}	Large-signal differential voltage amplification	1	V_{OPP} = 3 V, R_L = 2 kΩ	R_{AB} = 0	25°C	300	400	500	V/V
					0°C to 70°C	250		600	
				R_{AB} = 1 kΩ	25°C		13		
BW	Bandwidth (–3 dB)	2	V_{OPP} = 1 V, R_{AB} = 0		25°C		50		MHz
I_{IO}	Input offset current				25°C		0.4	5	µA
					0°C to 70°C			6	
I_{IB}	Input bias current				25°C		9	30	µA
					0°C to 70°C			40	
V_{ICR}	Common-mode input voltage range	3			25°C	±1			V
					0°C to 70°C	±1			
V_{OC}	Common-mode output voltage	1	R_L = ∞		25°C	2.4	2.9	3.4	V
V_{OO}	Output offset voltage	1	V_{ID} = 0, R_{AB} = ∞, R_L = ∞		25°C		0.35	0.75	V
					0°C to 70°C			1.5	
V_{OPP}	Peak-to-peak output voltage swing	1	R_L = 2 kΩ, R_{AB} = 0		25°C	3	4		V
					0°C to 70°C	2.8			
r_i	Input resistance		V_{OD} = 1 V, R_{AB} = 0		25°C		4		kΩ
					0°C to 70°C		3.6		
r_o	Output resistance				0°C to 70°C			30	Ω
C_i	Input capacitance				0°C to 70°C		5		pF
CMRR	Common-mode rejection ratio	3	V_{IC} = ±1 V, R_{AB} = 0	f = 100 kHz	25°C	60	86		dB
				f = 5 MHz			60		
				f = 100 kHz	0°C to 70°C	50			
				f = 5 MHz			60		
k_{SVR}	Supply voltage rejection ratio ($\Delta V_{CC}/\Delta V_{IO}$)	4	ΔV_{CC+} = ±0.5 V, ΔV_{CC-} = ±0.5 V, R_{AB} = 0		25°C	50	70		dB
					0°C to 70°C	50			
V_n	Broadband equivalent input noise voltage	4	BW = 1 kHz to 10 MHz		25°C		3		µV
t_{pd}	Propagation delay time	2	ΔV_O = 1 V		25°C		7.5		ns
t_r	Rise time	2	ΔV_O = 1 V		25°C		10.5		ns
$I_{sink(max)}$	Maximum output sink current		V_{ID} = 1 V, V_O = 3 V			3	4		mA
I_{CC}	Supply current		No load, No signal		25°C		18	24	mA
					0°C to 70°C			27	

(1) R_{AB} is the gain-adjustment resistor connected between gain-adjust pins A and B. If not specified for a particular parameter, its value is irrelevant to that parameter.

(1) The marketing status values are defined as follows:
ACTIVE: Product device recommended for new designs.
LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.
NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.
PREVIEW: Device has been announced but is not in production. Samples may or may not be available.
OBSOLETE: TI has discontinued the production of the device.

(2) Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check http://www.ti.com/productcontent for the latest availability information and additional product content details.
TBD: The Pb-Free/Green conversion plan has not been defined.
Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.
Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.
Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

(3) MSL, Peak Temp. - The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

(4) There may be additional marking, which relates to the logo, the lot trace code information, or the environmental category on the device.

(5) Multiple Device Markings will be inside parentheses. Only one Device Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Device Marking for that device.

(6) Lead/Ball Finish - Orderable Devices may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead/Ball Finish values may wrap to two lines if the finish value exceeds the maximum column width.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All semiconductor products (also referred to herein as “components”) are sold subject to TI’s terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its components to the specifications applicable at the time of sale, in accordance with the warranty in TI’s terms and conditions of sale of semiconductor products. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by applicable law, testing of all parameters of each component is not necessarily performed.

TI assumes no liability for applications assistance or the design of Buyers’ products. Buyers are responsible for their products and applications using TI components. To minimize the risks associated with Buyers’ products and applications, Buyers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI components or services are used. Information published by TI regarding third-party products or services does not constitute a license to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of significant portions of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI components or services with statements different from or beyond the parameters stated by TI for that component or service voids all express and any implied warranties for the associated TI component or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyer acknowledges and agrees that it is solely responsible for compliance with all legal, regulatory and safety-related requirements concerning its products, and any use of TI components in its applications, notwithstanding any applications-related information or support that may be provided by TI. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards which anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm and take appropriate remedial actions. Buyer will fully indemnify TI and its representatives against any damages arising out of the use of any TI components in safety-critical applications.

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI’s goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed a special agreement specifically governing such use.

Only those TI components which TI has specifically designated as military grade or “enhanced plastic” are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components which have ***not*** been so designated is solely at the Buyer's risk, and that Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components as meeting ISO/TS16949 requirements, mainly for automotive use. In any case of use of non-designated products, TI will not be responsible for any failure to meet ISO/TS16949.
