Thermal Considerations (All ECS25-60 Models)

In order to ensure safe and reliable operation of the PSU in the most adverse conditions permitted in the end-use equipment, the temperature of the components listed in the table must not be exceeded. See mechanical drawings for component locations. Temperature should be monitored using K type thermocouples placed on the hottest part of the component (out of any direct air flow).

Temperature Measurements (Ambient ≤50 °C)	
Component	Max Temperature °C
T1	110 °C
Q1	110 °C
C5	100 °C
C18	100 °C
