- Two fully independent diodes
- Fully insulated package

- · Low forward voltage drop
- Optimized for power conversion: welding and industrial SMPS applications
- · Easy to use and parallel
- · Industry standard outline
- UL approved file E78996

· Material categorization: for definitions of compliance please see www.vishay.com/doc?99912

<b>DESCRIPTION /</b>	<b>APPLICATIONS</b>
----------------------	---------------------

The VS-UFB201FA40 insulated modules integrate two state of the art ultrafast recovery rectifiers in the compact, industry standard SOT-227 package. The diodes structure, and its life time control, provide an ultrasoft recovery current shape, together with the best overall performance, ruggedness and reliability characteristics.

These devices are thus intended for high frequency applications in which the switching energy is designed not energy, such as in the machines, SMPS, optimized stored reduce both over (and snubbers) and
