## ST13009

### High voltage fast-switching NPN power transistor

#### Features

- Low spread of dynamic parameters
- High voltage capability
- Minimum lot-to-lot spread for reliable operation
- Very high switching speed

#### Applications

- Switch mode power supplies

#### Description

The device is manufactured using high voltage multi-epitaxial planar technology for high switching speeds and high voltage capability. It uses a hollow emitter structure to enhance switching speeds.

**Figure 1. Internal schematic diagram**

**Table 1. Device summary**

| Order code | Marking <sup>(1)</sup> | Package | Packaging |
|------------|------------------------|---------|-----------|
| ST13009    | 13009 L<br>13009 H     | TO-220  | Tube      |

1. Product is pre-selected in DC current gain (group L and group H). STMicroelectronics reserves the right to ship either groups according to production availability. Please contact your nearest STMicroelectronics sales office for delivery details.
